Mental Retardation Priority Population

The Priority Population for mental retardation services includes those persons who request and need services and possess one or more of the following conditions:

* Mental retardation, as defined by Section 591.003 (13), Title 7, Health and Safety Code
* Autism as defined in the current edition of the Diagnostic and Statistical Manual (DSM)
* Pervasive Developmental Disorder (PDD) as defined in the current edition of the DSM
* Eligibility for OBRA '87 mandated services for mental retardation/related condition

The presence of mental retardation must be determined through DADS eligibility determination process or through the use of assessments performed by qualified professionals as per interagency memoranda of understanding. Diagnoses of autism or PDD must be reviewed and endorsed by the Local Authority. For persons with mental retardation, autism, or PDD, the priority population includes only those individuals whose needs for services can be most appropriately met through programs currently or potentially offered by the DADS system rather than some other service system. Services are to be offered in coordination with efforts of other agencies to ensure that all services are provided by agencies as required by laws, rules, and regulations. The priority population does not include anyone whose service needs may be most appropriately met through other means, as determined by DADS. Persons who are members of the Priority Population are eligible to receive services from the DADS system. Since resources are insufficient to meet all the service needs of all the members of the Priority Population, services are provided to meet the most intense needs first.
